SUMMARY

With six years of experience in property management, valuable skills in leadership and project management have been developed. Since transitioning from that career path, new technical skills have been gained, including JavaScript and React. The goal is to break into a career in technology, whether in an office environment or remote. Contributing to a full stack development team while continuing to grow and expand knowledge in the field is a key objective.

LANGUAGES | FRAMEWORKS

Java, JavaScript | React SpringBoot

EXPERIENCE

TeeForge— LaunchCode Capstone Project
- Created TeeForge to help customers visualize designs on t-shirt orders.
- Built the website's key feature allowing users to preview shirt designs before purchase.
- Developed an order form page to streamline and improve the ordering process.
- Tech Stack: Java, JavaScript, React

Asset Manager — St. Louis Parking Company

May 2019 - July 2025
- Managed properties and tracked projects at four locations across St. Louis.
- Led a team of 18 full- and part-time associates across multiple sites.
- Researched and implemented profit-increasing strategies, achieving revenue growth of over 7% above projected sales at two locations.
- Conducted client meetings with hotels, sports stadiums, and law enforcement to understand and meet specific needs.

Student — LaunchCode

May 2025 - Present
- Transitioned from property management to focus on a career in software development.
- Gained skills in JavaScript and React while completing the first solo coding project.
- Currently enrolled in LaunchCode, with plans to continue professional development and expand technical expertise.

Volunteer— American Legion Premier Boys State

June 2017 - Present (8 events)
- Lead groups of high school students through the American Legion's leadership camp each summer.
- Instruct students on running effective meetings and conducting themselves in leadership roles.
- Provide mentorship to ensure participants gain the most value from the week-long program.
